•	Prior to 1951, Wollweber was Director General, Shipping, Berlin. He was then made Secretary of State in the Ministry of Traffic. On 10 January 1952, Richard Staimer, a former inspector of the Volkspolizei and son-in-law of Wilhelm Pieck, president of the Russian Zone of Germany, was appointed deputy Director General, Reilroads, Serlin, Gruber was previously known as the president of the Cottbus regional railroad headquarters.	
,	The reconstruction of the dismentled second track of the Guben-Falkenberg railroad line which is of great importance for Soviet transit traffic was included as a priority project in the 1952 construction program. A sum of 31,584,000 eastmarks has been earmarked for the execution of this project in the 1952 Investment Plan.	
	The line between Grossbeeren and Seddin continues the couthern section of the Berlin outer freight ring toward the west. As this section of the Berlin outer freight ring was double-tracked in 1951, the reconstruction of the second track on the Grossbeeren Seddin line is a necessity. The project, which will cost an estimated 5,750,000 eastmarks, was included in the 1952 construction program of the Berlin regional railroad headquarters.	20
